*Product development, production coordination
and export support from India.*

WHO WE ARE

Next Move Group is an India-based apparel sourcing and production coordination partner focused on export programs for men's shirts, denim jeans and cotton t-shirts.

We connect buyers with suitable manufacturing capabilities, coordinate development and production, and maintain clear quality checkpoints from sampling through shipment readiness.

WHAT MAKES US DIFFERENT

Focused Programs

Men's shirts, denim jeans and T-shirts as our core product programs.

Coordinated Execution

Sampling → development → material confirmation → production → quality checks → shipment readiness.

Manufacturing Network

Production is placed with suitable manufacturing partners based on product, capacity and order requirements.

Buyer Visibility

Structured updates and milestone tracking through NMG OrderTrack — OPT.

OUR CORE CATEGORIES

PROFESSIONAL & SEASONAL SHIRTS

Tailored excellence for every climate.

4-5

SHIRTS CORE SPECIALIZATION

We develop export-ready men's woven shirt programs for formal, casual, seasonal and utility applications.

Core Directions

- Oxford, linen, poplin, twill and selected blended constructions
- Solid, check and stripe programs
- Formal, casual, overshirt and seasonal silhouettes
- Buyer-defined fit, collar, cuff, pocket and construction details

Materials and performance requirements are confirmed against the buyer's specification and approved samples before production.

SHIRT PROGRAM DEVELOPMENT

- Each program begins with the buyer brief, reference sample or tech pack. We coordinate fabric and trim options, fit development, sampling, approvals and production readiness.
- Available directions depend on confirmed material, construction and order requirements. Product claims are agreed only where testing or supplier documentation is available.

JEANS COLLECTION

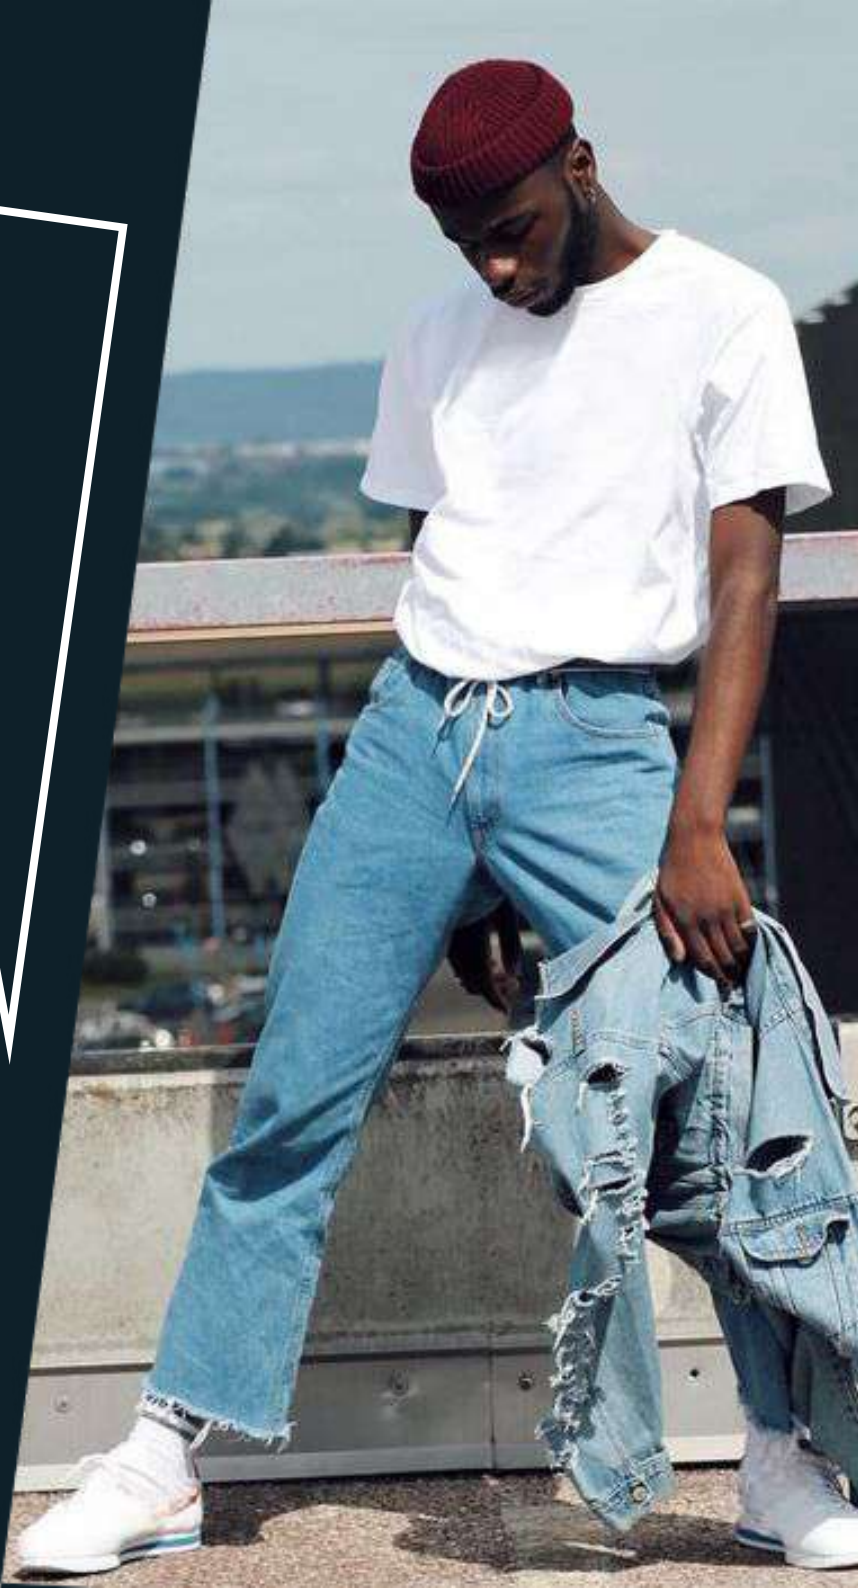

DENIM JEANS — CORE MANUFACTURING PROGRAM

We develop export-oriented jeans programs around buyer-approved fits, fabrics, washes, trims and finishing standards.

Program Scope

- Regular, slim, relaxed, tapered and selected fashion fits
- Rigid and stretch denim options subject to specification
- Clean, vintage, washed and distressed directions developed to buyer brief
- Overshirts, jeans and selected denim bottoms

All materials, hardware, wash references and construction details are confirmed during development before bulk production.

1. REGULAR FIT JEANS

Product Features

- Straight-leg silhouette
- Comfortable thigh fit
- Everyday commercial styling
- Durable industrial stitching
- Strong wholesale repeat order potential

Recommended Fabric

- 11–14 oz Denim – 100% Cotton
- 11–12.75 oz Denim – 98% Cotton + 2% Elastane

2. SLIM FIT JEANS

Product Features

- Modern tapered silhouette
- Mid-rise waist
- Stretch comfort fit
- Reinforced pocket stitching

Recommended Fabric

- 11–12.75 oz Denim
- 98% Cotton + 2% Elastane

3. RELAXED FIT JEANS

- Product Features**
- Relaxed silhouette
 - Extra comfort through hip and thigh
 - Trend-focused casual fit
 - Heavy-duty construction
- Recommended Fabric**
- 11–14 oz Denim – 100% Cotton
 - 11–12.75 oz Denim – 98% Cotton + 2% Elastane

4. STRAIGHT FIT JEANS

- Product Features**
- Classic straight-leg silhouette
 - Clean everyday denim styling
 - Strong commercial retail appeal
- Recommended Fabric**
- 11–14 oz Denim – 100% Cotton
 - Comfort Stretch Denim options available

5. LOOSE FIT JEANS

- Product Features**
- Oversized relaxed silhouette
 - Streetwear-inspired fit
 - Trend-driven casual styling
- Recommended Fabric**
- 11–14 oz Denim – 100% Cotton

6. SUPER BAGGY JEANS

- Product Features**
- Extra-wide oversized silhouette
 - Strong streetwear appeal
 - Trend-focused youth category
- Recommended Fabric**
- 12–14 oz Denim – 100% Cotton

7. SKINNY HIGH WAIST JEANS

- Product Features**
- High-rise waist
 - Body-contouring silhouette
 - High stretch recovery
 - Fashion-focused retail styling
- Recommended Fabric**
- 10–11 oz Super Stretch Denim
 - 98% Cotton + 2% Elastane

8. MOM FIT JEANS

- Product Features**
- High-rise waist
 - Relaxed hip fit
 - Fashion-forward silhouette
- Recommended Fabric**
- 11–12.75 oz Denim
 - 98% Cotton + 2% Elastane

T-SHIRT MANUFACTURING PROGRAM

Buyer-Defined T-Shirt Development & Production

NMG coordinates T-shirt programs based on buyer-approved fabric, GSM, fit, colour, construction and branding requirements.

Core Program Directions

- Regular Fit T-Shirts
- 100% Cotton Single Jersey
- Buyer-defined GSM and finishing

Relaxed & Oversized T-Shirts

- Cotton jersey and heavier knit constructions
- GSM developed according to buyer requirement

Private Label & Customization

- Custom colours
- Printing & embroidery
- Neck labels, care labels and hangtags
- Buyer-defined measurements and construction
- Custom packing requirements

CUSTOM FABRIC DEVELOPMENT

- For qualified bulk programs, specific GSM, cotton quality, knit construction, finish and colour can be investigated through suitable Tiruppur sourcing and mill partners.
- Fabric composition, GSM, finish, MOQ and technical specifications are confirmed against the buyer requirement and approved sample before bulk production.

PRODUCT DEVELOPMENT

FROM BRIEF TO APPROVED SAMPLE

1. Requirement Review

Product, target price, quantity, delivery window and compliance needs.

2. Material & Trim Direction

Options coordinated against the approved brief.

3. Sampling & Fit

Proto, fit and revised samples as required.

4. Pre-Production Confirmation

Approved specification, measurements, construction, labeling and packaging.

5. Production Readiness

Critical details aligned before bulk execution.

QUALITY & PRODUCTION CONTROL

Consistent reporting, documented approvals and timely escalation help buyers make decisions before issues reach shipment.

QUALITY CHECKPOINTS

- Buyer specification and approved sample reference
- Material, color and trim confirmation
- Pre-production alignment
- In-line workmanship and measurement checks
- Finishing, labeling and packaging verification
- Final inspection coordination before shipment readiness

Inspection scope and acceptance criteria are agreed for each order. Testing or certification claims are included only when supported by valid documentation.

PRIVATE LABEL & EXPORT EXECUTION

YOUR BRAND, YOUR SPECIFICATION

We coordinate buyer-approved private-label details across men's shirts, denim programs and T-shirts:

- Main labels, size labels and care labels
- Hangtags, barcodes and packaging components
- Buyer-defined measurements and construction
- Fabric, trim and colour approvals
- Folding, packing and carton requirements
- Export documentation coordination

Third-party brand names shown in references or source material are not represented as NMG customers.

MANUFACTURING NETWORK

CAPABILITY-LED PRODUCTION COORDINATION

- Next Move Group works with a network of manufacturing partners across Indian apparel and textile hubs. Production placement is based on product type, technical requirements, capacity, compliance expectations and delivery needs.
- NMG coordinates communication, development, approvals, production follow-up and quality checkpoints as the buyer's on-ground partner.
- We do not present partner factories as NMG-owned facilities. Factory identity and sensitive operational information remain confidential unless disclosure is required and authorized for a specific program.

NMG ORDERTRACK — OPT

CUSTOMER-FACING PRODUCTION VISIBILITY

NMG OrderTrack — OPT gives buyers a structured view of agreed production milestones and approval status.

- Buyer-facing visibility can include:
- Development and sample status
- Material and trim confirmation
- Pre-production readiness
- Production milestone updates
- Quality checkpoint status
- Packing and shipment readiness

OPT is designed to improve communication and decision-making while protecting confidential information. It does not expose supplier or factory identities, internal costs, CMT, margins or private operational data.

PARTNER WITH US

Build with clarity. Scale with control.

Develop men's shirts, denim programs and T-shirts with an India-based partner focused on coordination, quality and export readiness.
